## The GOLDen Opportunity

By Tyler McTigue – Deer Lakes High School

The Pennsylvania Association of Student Councils has many conferences and programs that it offers to delegates among the Commonwealth. Many of those I have taken advantage of, yet not the Gold Summer Workshop. So this past summer I decided I would attend the 2009 Grove City Gold Workshop. The Gold Workshop is a week long camp that focuses on developing young delegates into better leaders, and does it ever accomplish its goal! Going into the week, I felt that I had already known all there was to know student council related, but I was sorely mistaken! The Gold Workshop was a melting pot of ideas and projects that I have never even thought to think of. Who knew there was so much information? Along with the informative learning units and productive committees, there were also five separate color groups. Each color group became your council, and we had goals and things we needed to get done. It was great practice for me, going into my senior year as President, but I realized it was an awesome experience for those just entering high school. They were able to see how to interact with a variety of people who each had their own idea how to do something. The week simply cannot be explained in words. You make connections, build trusting relationships, all while enjoying life changing experiences. Although I must admit, I do have one regret going along with Gold . . . that I did not go sooner. So if you are ever curious about the program, ask someone. And my one word of advice is, don't pass up this GOLDen opportunity.

Advisors, keep this testimonial tucked away for next spring when you are encouraging students to attend summer workshops.
